MAMBU

4.3.10

Release Notes

Dec 5, 2016 -12:00 UTC

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Best practices to help you maximize the benefits

Beyond the major new features, the Additional Enhancements section include a list and brief description of every other enhancement or functional change included in the latest release—everything from email, to new report types, to security and packaging.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continuously improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com.

Contents

1. Bug Fixes

1.1 Transfer APIs performed during nightly appraisal can lead to invalid loan balance when transfers are also triggered at the same time

In case multiple users were trying to make transfers between the same accounts, the balances and transactions of the accounts were not updated properly.

The problem was affecting only concurrent transfers, but now we fixed this.

1.2 Notification isn't sent only to the recipient, if account holder has a Credit Officer or user link custom field assigned

Notifications were not correctly filtered and they were sent to all recipients, even if the notification template had a specific a recipient filter (client/group, credit officer or user link custom field).

This issue is fixed and now the notifications are sent to the correct recipients.
